

Principal's Message
February 2010

The first semester has come and gone and the end of the school year will quickly be upon us. The next few months will be extremely busy ones for staff and students as we prepare for the end of the school year and the beginning of the next one.

Some important events that will be occurring in January and February are student registration for courses next year. The counselors will be visiting the class rooms and will distribute course selection sheets to students. Please assist your child in the selection of their courses. You can access our course selection guide at the District website, www.mantecausd.net.

The CAHSEE testing will occur on March 16th and 17th for all Sophomores and those Juniors and Seniors still needing to pass the exam. The test covers two areas, Language Arts and Mathematics. Staff is currently reviewing and preparing students for the exam as part of the curriculum they are covering in their classes. It is important that students are not absent on these testing dates. STAR testing will begin the week of April 19 and AP testing will follow shortly after that for students enrolled in AP courses.

The staff at Manteca High is developing academic and career pathways for students and will continue to pursue professional development in literacy and promoting reading comprehension. Our goal is to provide every student with the tools and skills they will need to pursue post-secondary education as well as the career of their choice.

Manteca High is a great learning environment and will continue to pursue excellence and provide opportunities for students to enjoy themselves as they prepare for their future.

Sincerely,

Doug McCreath, Principal
